Wall Paper

Everest Wall Boards are synonymous with hassle free and speedy wall solutions. Everest Wall Boards are made using the revolutionary HPSC technology. This unique technology makes these boards totally moisture resistant, termite and fire resistant. These boards are ideal for residential, commercial and industrial usage.

Everest Wall Boards in combination with different substrate framework like timber, steel and aluminium, offer unique advanced dry wall constructions, which

leverage space utilization to the maximum with substantial savings on time. Everest Wall Boards gives the Architects major flexibility of changing designs with thermal & acoustic insulation besides being maintenance free and highly durable.

Everest Wall Boards provide both uniform gap/groove and monolithic jointless finish (using specially made beveled-edges

boards). These wall systems allow you to do the finishes with paints, veneers, wall paper, etc.

In other words, Everest Wall Boards allow you to have the finish of your choice and truly help you

"Build your imagination".

Areas of Application:

- Internal Walls
Half Height / Full Height
- Internal Wall Lining*/ Paneling
- Prefabricated Shelter –
Internal / External walls

* Wall lining- to cover damp / seepage prone walls.

Design plays a vital role in creating the ambience of a house, office or other commercial places. Designer walls can help bring out the very best in the character of walls. Everest Designer Wall Boards provide aesthetically appealing solutions along with strength & durability. Walls made out of Everest Designer Wall Boards are fire resistant, termite proof and moisture resistant making

them unique walling & paneling solutions for residential, commercial & institutional use.

Everest Designer Wall Boards are self-embossed, pre-primed, ready to paint which offers an excellent base for you to

give final paint or polish finishes.

Everest Designer Wall Boards will never let your imagination run out of designs and you will get the finish of your choice to

"Build your imagination".

Areas of Application:

- Internal Walls
Half Height / Full Height
- Internal Wall Lining*/ Paneling

**Wall Lining- for providing decorative wall finish in damp / seepage prone walls.*

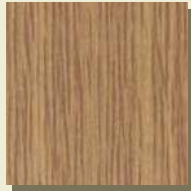

HEAVY DUTY WALL BOARDS

FINISHING CHOICES

Polish

Laminate

Ceramic / Vitreous Tiles

Paint

Render

Whenever your concern is durability, strength & prolonged exposure to weathering elements (like sun, rain & UV rays) in a wall, think of Everest Heavy Duty Wall Boards.

Everest Heavy Duty Wall Boards help create both internal and external walls which are impact resistant, load bearing & require minimal maintenance. They are ideally suited for commercial & industrial applications.

Everest Heavy Duty Wall Boards are exceptionally stable in dimension and offer resistance to damages caused by permanent dampness or seepages. They are excellent for all kinds of internal wet area lining especially in residential segment.

Everest Heavy Duty Wall Boards can accept wide range of surface finishes which provides an option to the architect/designer to "*Build your imagination*".

Areas of Application:

- Internal Walls
High traffic / Impact prone areas
Residential / Commercial / Industrial
- Wet Area Lining - Kitchen, Bathrooms
- External Walls
Non load bearing / Load Bearing Walls
Residential / Commercial / Industrial
Cladding Walls in Warehouses / Factories
- Pre fabricated Shelter –
Internal / External Walls

Unique Tongue and Groove Joint

In today's robotic era, time and space are being squeezed on every front. Everest Solid Wall Panels offer solutions to these constraints by providing options with a promise of **Strength, Speed and Safety**.

Everest Solid Wall Panels are a revolutionary dry wall solution which maintain the solid effect of a conventional brick or block wall and offers:

- Speed - 20 times faster
- Space - 3 to 5% additional
- Light Weight - 90% lighter than brick / block wall
- Fire Rated > 2 hours

Everest Solid Wall Panels are sandwich panels made out of **FRACC** and Everest Wall Boards. Their unique tongue and groove joining system facilitates rapid construction and maximizes the space utilization.

It has all intrinsic properties in terms of durability, fire resistance, thermal & acoustic insulation relevant to any wall construction. Everest Solid Wall Panels epitomizes an

extremely speedy & elegant wall solution which is compatible to host of surface finishing choices like paint, veneers, texture coating and wall paper.

Everest Solid Wall Panels allow you to have the finish of your choice and truly help you

" Build your imagination ".

Areas of Application:

- Internal Walls
Residential / Commercial / Industrial
- External Walls
Cladding Walls in Warehouses / Factories
- Pre fabricated Shelter
Internal / External Walls

TECHNICAL & PHYSICAL SPECIFICATIONS

WALL BOARDS

Termite Proof

Moisture Resistant

Fire Resistant

Durable

Size

- 3050 mm x 1220 mm
- 2745 mm x 1220 mm
- 2440 mm x 1220 mm
- 1830 mm x 1220 mm

Thickness

- 6 mm, 8 mm, 10 mm & 12 mm

Edge Profile

- Square • Beveled

Fire Resistance Properties

Everest Wall Boards are non combustible material and qualifies for early fire hazard indices as per AS-1530, Part 3 and Resistance to Fire as per BS-476, Part 4, 5, 6, 7&8.

Moisture Resistance Properties

Everest Wall Boards are moisture resistant material and is tested as per IS 14862

Durability

Everest Wall Boards are highly durable material and excel in all durability tests as per IS-14862.

Both Metric and Imperial systems are available.

Tolerance Limits are guided by IS: 14862.

Special Sizes, thicknesses and Calibrations can also be made available to meet specific requirements.

Sanding, Hydrophobating, Special Coating can be carried out as per order.
