

*Montage system*

*Solid base of your terrace...*

## About System

*Innovation between invisible terrace montage system.*

*- Peter P|CLIP System,*

*Special construction made from aluminum legar, PICLIP with screw, Peter PUR, Peter MAT, adjustable pedestals and other system accessories. Peter PICLIP system is high quality montage system. It is great construction under wood terrace, composite or ceramic slabs terrace.*

*It is a great solution for the old fashion plastic construction which are less resistant for outside conditions. Also thanks special construction we can change one plank without deconstructing terrace. Our system is great solution for the big investments. The quality of material is approved the many certificates.*

# ***Application***

*PeterPICLIP system we use for:*

*Paving terrace, ceramic and  
stone slabs terrace*

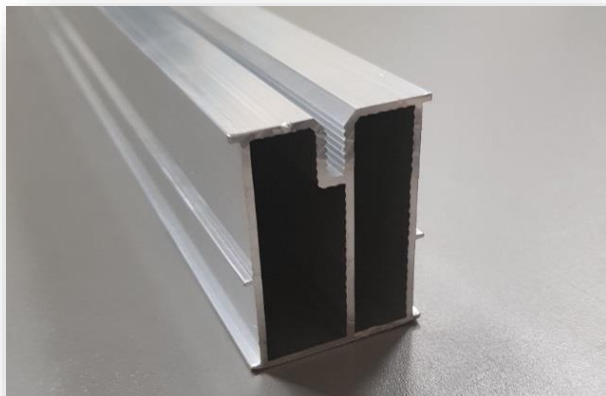

*Composite terrace*

*Wooden terrace*

# LEGAR

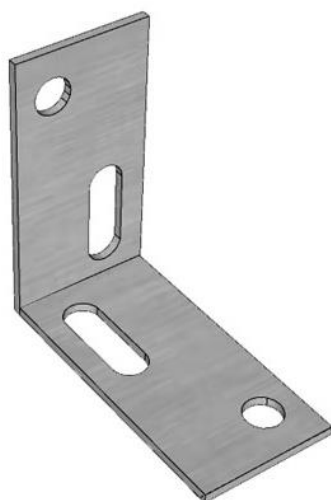

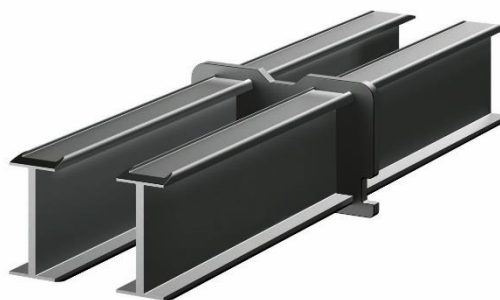

*Aluminium profile with screw channel and the special groove on the both sides. Whole form of legar is preper for our clips PICLIP, without drilling. Legar also fit perfect our adjustable pedestals with click adapter. This construction of Peter PICLIP legar make your montage clean, fast with any problems. This is the biggest innovation on the building market.*

## LEGAR CONNECTOR

*Art. No. 202407*

*High quality plastic element connected two legar's. His construction is special dedicated for our two system legar's.*

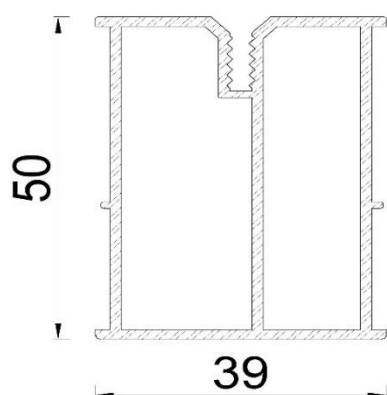

## CORNER CONNECTOR

*Art. No. 202404*

*Element which connected two legar's. High quality material makes strong construction under terrace.*

## PeterPCLIP System Legar

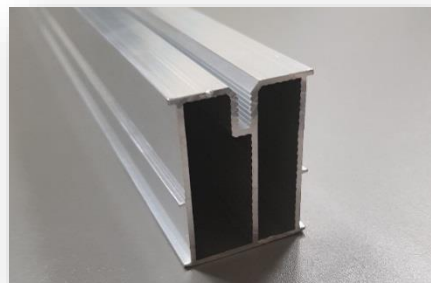

50x39x4000 mm.

Art. No. 202406

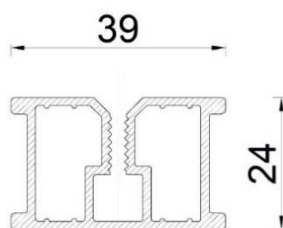

Higher legar are stronger for all construction thanks extra aluminium prop.

Technical draw.

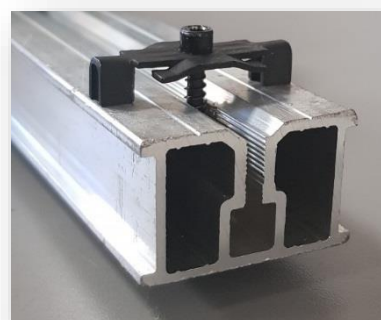

## PeterPCLIP System Legar

24x39x4000 mm. Art. No. 202405

Small legar is the one of the most popular. He found application in all kind of investment, special for terrace where is small different between ground from main terrace.

Technical draw.

# Montage Clip

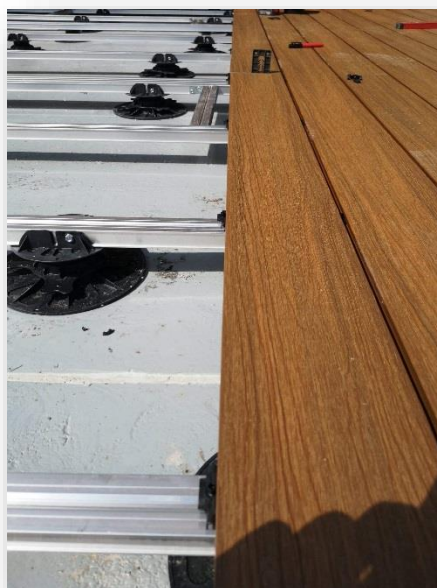

## SystemPeter PICLIP

Art. No. 202401

PICLIP Clips are high quality element of construction, they are made from the black metal. Black metal is invisible after full montage. Black color make really esthetic look in outside construction. Special structure of PICLIP make the same gap size between planks.

Individual terrace boards can be change without any problems. Also they are perfect suit almost all kinds of composite planks with the side grooves popular among producers composite on the polish and Europe markets.

### **BEGINING CLIP**

Art. No. 202402

Clip is necessary to begin all the terrace. Clips are made from high quality material. Black color make them more invisible.

# ADJUSTABLE PEDESTALS

## -leveling system of

## Peter **PICLIP**

*Adjustable pedestals are leveling system of PeterPICLIP. Adjustable pedestals are best solution for leveling terrace without needing extra hard ground. They are really strong and easy assembly materials. They are high resistant for the weather conditions. Our pedestals are using under ceramic, stone slabs. They are using also under legar construction for composite or wooden terrace.*

*The big range of our products gives more universal application. This great solution for small terrace but also for a big investment. Also, our adjustable pedestals are perfect suit with other Peter PICLIP system products like legar's or Peter MAT. Adjustable pedestals have all the certificates and loaded tests which are necessary in public investments.*

### **Range of adjustable pedestals for paving:**

- 8mm [Art. No. 202409](#)
- 25-40 mm [Art. No. 202410](#)
- 40-60 mm [Art. No. 202411](#)
- 60-90 mm [Art. No. 202412](#)
- 90-150mm [Art. No. 202413](#)
- 150-260mm [Art. No. 202414](#)

### **Range of adjustable pedestals for decking:**

- 25-40 mm [Art. No. 202415](#)
- 40-60 mm [Art. No. 202416](#)
- 60-90 mm [Art. No. 202417](#)
- 90-150mm [Art. No. 202418](#)
- 150-260mm [Art. No. 202419](#)

## **EXTENSION 110m**

*Art. No. 202420*

*Adapter extending the adjustable pedestal for ceramic slabs and legar's.*

## **VOLUME PAD UNDER CERAMIC OR STONE SLABS**

*Art. No. 202421*

*Cushioning and soundproofing elastic pad.*

## **PETER MAT 25x25x3mm**

*Art. No. 202422*

*Elastic pad covering ground under adjustable pedestals. It is a necessary element protecting against damage to thermal insulation.*

## **CLIPS FOR CERAMIC SLABS**

*Art. No. 202424*

Dedicated element under ceramic slabs for aluminum construction. Provides an even grout size on an aluminum structure. An innovative solution for terraces made of ceramic or stone slabs.

## LEVELING „U” PADS

Plastic leveling pads are extra solution for leveling terrace. Leveling pads make possible leveling when different between ground is less than 6 cm. Form of pads make them good to connection together. It is good solution to get different sizes. Leveling pads are made are from high quality plastic. Material is light but really strong withstand heavy loads.

### Sizes of Levelling “U” Pads

- Leveling „U” pads blue– 1 mm  
Art. No. 202426
- Leveling „U” pads white – 2 mm  
Art. No. 202427
- Leveling „U” pads red – 3 mm  
Art. No. 202428
- Leveling „U” pads black – 4 mm  
Art. No. 202429
- Leveling „U” pads green – 5 mm  
Art. No. 202430
- Leveling „U” pads yellow – 10 mm  
Art. No. 202431

## Peter PUR Art. No. 202408

One-component sealing mass. Strong, elastic, sealing use to building and industry industries. Color grey of Peter PUR made invisible look full construction. Peter PUR using to the many kind of surfaces:

- Bonding and sealing highly movable surfaces made of concrete, wood, WPC products, bitumen, stone, etc.
- Sealing expansion joints.
- Bonding plastic facade panels and decorative panels.
- Sealing of bolted and welded joints.
- Sealing of tanks with petroleum products.
- Sealing in shipbuilding and boatbuilding.
- Sealing and gluing car body parts, bus and container cover.

## Border elements for ceramic slabs terrace.

*Border side cover for ceramic slab terrace in SystemPeter PICLIP is easier than before. Cover system from two parts upper and bottom. Both elements are fit adjustable pedestals from our*

*system. They are perfect suit size of pedestals which are make perfect and stable constructions around whole terrace.*

*Next part of the special slab construction is the clip for dilatation space. It is using for draining whole terrace also it is esthetic finishing of the side from the wall side. Metal ending elements are high quality and resistant time using.*

Art. No 202448-Bottom border clip/Art. No 202447- Upper border clip

Art. No 202449- Dilatation clip

## ***ABOUT COMPANY***

PINAT company was established a few years ago  
in the heart of Poland, Kalisz.

We are company dealing assembly composite,  
wooden and ceramic slabs terraces.

We know everything about the montage and we  
still try made something more for our employees.

We did try make our work easier and faster.  
Material stronger and more resistant

That was our target.

The created system in our company meets all the  
above conditions.

Strong, high quality, resistant for weather  
condition, fast and easy to assembly is
